

YOU ARE NOT ALONE!

Dementia360 is a *comprehensive care coordination program* designed to support **YOU** in caring for your family member at home because no two experiences providing care for a person living with dementia are the same.

The **Dementia360** team will work with **YOU** to *identify you and your family member's unique needs*, challenges and what matters most. Together we'll design a Personalized Roadmap to address these needs, learn more about the disease and plan for the future.

Caregiving for someone living with dementia changes over time.

Dementia360 is designed to *provide support throughout your caregiving journey*. As your needs change, our interactions and interventions will evolve to ensure **YOU** feel supported.

“This program is so helpful for caregivers who feel lost in what to do for their family members. I no longer feel like I am in this alone.”

Caring for someone living with dementia at home?

DEMENTIA360 CAN HELP!

Presbyterian
SeniorCare
NETWORK.

One study found that persons living with dementia who were part of a **home-based** dementia care management program were able to receive care in their homes for nearly **10 months longer** than those without such support.

HOW DEMENTIA360 CAN HELP

Dementia360 provides a *caregiving support system* that can help you:

- Improve the time together that you and your family member share.
- Learn more about dementia and care strategies to lessen stress while you provide care.
- Design creative approaches to address challenges and successfully manage your family member's disease at home.
- Connect with the right community resources to support you at the right time.
- Strike a balance between caring for your family member and caring for yourself.
- Extend the length of time your family member can comfortably and safely stay at home.

HOW DEMENTIA360 WORKS

Your Own Care Coordinator

Every member is matched with a personal **Dementia360** Care Coordinator who will be your support system. Each Care Coordinator is a Certified Dementia Practitioner with an extensive healthcare background.

In-Home Visit

At the beginning of the program, your **Dementia360** Care Coordinator will visit your home, which allows us to get to know each other, learn more about your caregiving routine, understand your home environment and identify how **Dementia360** can best support you and your family member.

Personalized Roadmap

After your in-home visit, you will receive a resource guide and Personalized Roadmap. Based on the needs you indicated were most important during the initial visit, we will prioritize which interventions and skills are most important to work on together.

Ongoing Support

You'll have regularly scheduled follow-up calls with your **Dementia360** Care Coordinator where you work together on the items from your Roadmap, identify new areas of focus and evaluate potential solutions. You can also contact your Care Coordinator with questions or concerns at any time.

DEVELOPED BY A LEADER IN DEMENTIA CARE

Presbyterian SeniorCare Network® is recognized as a **Dementia Care center of Excellence** based on nearly *30 years of innovation* in dementia care. We developed **Dementia360** as one of the country's first *in-home care coordination programs* designed specifically for family caregivers and people living with dementia.
